CISAL: NATIONAL COUNCIL TO THE TAX CENTER, PENSIONS AND SOUTH

18 A moment of **Cisal** national council Posted on: 31/10/2019 14:52 "Three intense days. Cinquecento between secretaries of federations, councilors and delegates. Three days of **Cisal** in the National Council was staged in Rimini October 29 to 31. Three days between what has been done, both in technical and organizational terms, and what needs to be done, elaborating strategies for the future and reaffirming the strength of their autonomy, according to which the **Cisal** has always managed to hold the bar straight forming a certainty for many, workers or pensioners, find themselves every day to fight for the defense of their rights and the search for new opportunities." And 'what it is said in a statement the union. "It 'was - he explains - the report of the Secretary General, Francesco Cavallaro, to illustrate the **Cisal** line on the hot topics included in the financial 2020, on which the Autonomous Confederation expressed criticism but providing content and alternative measures."

- Revenue : The budget package, the launch of the government, has obvious shortcomings, and has not been satisfactory; in particular measures that the government intends to prepare not materialize for a decisive action for the fight against tax evasion. The governs assumed, in fact, the introduction of rules on 'conflict of interests' in milder form and not very effective, such as not to allow the start of a truly virtuous circle in relation to the emission of scontrinatura / tax billing for the purposes of effective deductibility expenses. **Cisal**, on point, repeats its proposal on the subject, which provide a full and effective implementation of conflict of interest, the example of what the electronic scontrinatura implemented in the field of health care costs.

- Pensions : **Cisal** reiterates the need to keep the law on the portion 100. However, it believes that it should serve to launch an employment circuit. It is therefore proposed that current law already amended, by introducing, for institutions and companies, a compulsory rate of new hires in the event of retirement of workers at height 100. The **Cisal** also reiterates that any further regulations on social security matters must be thesis to the substantial cancellation of the immoral and Fornero Dini reforms that penalize unacceptable degree pensions and are in danger of producing a generation of elderly people confined to poverty regime.

- South : the directions given by gGoverno not propose any measure aimed at coping with the emergency South. The South of Italy continues to be increasingly depopulated and to be characterized by alarming economic indicators with respect to the gap with the rest of the regions of Italy and Europe.

- Representation union : worries about the possibility that they are prepared laws on trade union representativeness and undemocratic clearly placed to service the special needs of some trade union confederations at the expense of others. **Cisal** reiterates in this regard that the high road remains the full implementation of Article 39 of the Constitution which may be followed as well as Article 46. Any other solution is unconstitutional and must also be countered by recourse to judicial actions.

- Pubblico impiego e pubblica amministrazione : rimane insoddisfacente la condizione dei lavoratori del pubblico impiego che, dopo aver avuto un rinnovo contrattuale dopo dieci anni di blocco, ha il contratto scaduto dall'inizio dell'anno con prospettive di rinnovo ancora non garantito. Contestualmente questo governo si sta contraddistinguendo per la totale assenza di qualsivoglia proposta in materia di lotta allo spreco e, comunque, di razionalizzazione della spesa pubblica.

- Trasporti : il pesante ritardo infrastrutturale del Paese, unita alla difficoltà di connettere uniformemente tutto il territorio nazionale, è certamente un elemento che influisce negativamente sulle possibilità di sviluppo dell'economia nazionale e sulla manifestata volontà governativa di adottare politiche green. La confederazione conferma l'importanza del documento che il coordinamento **Cisal-Trasporti** ha presentato al ministero competente.

- Politics : overall the **Cisal** condemns the behavior of the government and with contradictory attitude is putting in place a clearly discriminatory

conduct within the trade union movement by setting a preferential relationship with only a few unions in violation of the most elementary rules. Fixed points, underlined, pointed out and enclosed in a shared final motion and approved unanimously by all present and that will be part of a document / report sent to the Prime Minister, Giuseppe Conte. **PLAY RESERVED** Copyright © Adnkronos.
